

# TRACKWAY DELIVERY™ – RIGHT DELIVERY, EVERY TIME!

**Do you know how much more efficient your deliveries would be if you could avoid shipping mistakes with more accurate tracking and monitoring of customer deliveries?**

The Trackway Delivery service collects and transmits real-time information about customer deliveries and ensures that every customer gets the correct delivery – without errors. This delivery tracking service can be adopted easily and quickly, and it includes terminal devices, training, user support and a connection to your company's information systems – for a single affordable monthly fee.

## **Trackway Delivery is an affordable and quickly adoptable wireless delivery tracking service.**

With Trackway Delivery, you're always up to date on the actual status of your customer deliveries. For example, you'll know who picked up and transported the delivery, and when and where the customer received it. The system also enables you to react quickly to exceptional circumstances. The service will immediately alert the driver if the delivery or the customer turns out to be the wrong one. This ensures that the right customer always receives the right delivery.

The Trackway Delivery service enables you to track drivers and cars from your company's offices, as well as ensure that deliveries are made efficiently and on time. The service also enables you to compile statistics of the delivery destinations and receive automatic deviation alerts.

How much would a real-time Trackway Delivery service improve your productivity? How can you be sure it's beneficial?

## **RISK-FREE START-UP**

The surest way to do this is to test the system yourself and see how well it works. You can have the Trackway Delivery system for a two-week test run – for free. A practical test will show beyond a shadow of a doubt whether delivery tracking would be useful for your company.

You can also determine the system's usefulness by calculating how much time and resources your company uses on tracking deliveries that are not made correctly and fixing those mistakes.

And what if the customer is particularly important – how expensive could a wrong delivery then become?

## EASILY ADOPTED AND AFFORDABLE SERVICE

You can now get an overall delivery tracking service at an affordable fixed monthly rate. The Trackway Delivery service packet includes the required terminal devices and training and support services. You will only pay a monthly fee starting from €50 per user.

We will take care of installation, implementation and maintenance for you, as well as help you in problem situations. We will guide the end users and, if necessary, integrate the system into your operational management system.

## WHAT ARE THE ACTUAL BENEFITS OF THE TRACKWAY DELIVERY SERVICE?

The real-time delivery tracking system will make your operations more efficient in many ways. When multiplied, even the smallest individual impacts can lead to significant annual savings.

### THE TRACKWAY DELIVERY SERVICE OFFERS THE FOLLOWING BENEFITS FOR THE CUSTOMER:

- The quality and efficiency of deliveries are improved, because
  - mistakes in deliveries are reduced;
  - the time it takes to fix mistakes in deliveries is reduced;
  - the automated deviation alarm enables mistakes to be fixed immediately and on the spot.
- The management will receive clear statistics of the deliveries.
- The service makes the driver's work easier and simpler and reduces the risk of human error.
- Customer satisfaction improves in concert with the quality of deliveries.

### TRACKWAY DELIVERY – A SUPERIOR COMPREHENSIVE SERVICE

- An easily implemented and affordable service
- Thanks to our outsourced software maintenance and support, no extra resources or skills are required
- No expensive software or hardware investments – one monthly fee covers everything
